

Features

- Motor with Integrated Electronics
- Outer Runner Type Motor with IP24 Protection
- PWM, Analog Voltage and 3 Speeds Control
- Maintenance-Free Ball Bearings
- More Than 25,000hrs Operating Life
- EMC Compliance version available
- RoHS Compliant
- High Efficiency, Low Consumption, Low Noise
- Motor Protection: Reverse Polarity, Under Voltage, Over Voltage, Over Current, Stall Torque
- Customization available for special performance and specifications

Specification

P/N	Voltage	Max. Speed (rpm)	Air Flow (m ³ /h)	Air Flow (cfm)	Power Input (W)	Current Input (A)	Motor Type
BB-11014	24V	3800	1250	738	404	15.5	EM-2161

Remark

1. Airflow figures shown are measured at st static pressure 0 mm/in.
H₂O, detailed airflow curve for each part number is available on request
2. Airflow 1m³/h =0.59 cfm
3. Test voltage- 12V at 13.5V, 24V at 27V
